No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1983 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

MADE IN THE UNITED STATES OF AMERICA

CONTENTS OF VOLUME 223

NUMBER 1, MAY 1983

INVITED PAPER

- Biochemistry and Physiological Role of Methionine Sulfoxide Residues in Proteins
Nathan Brot and Herbert Weissbach 271

COMMUNICATION

- Effect of ppGpp on the Accuracy of Protein Biosynthesis
D. B. Dix, R. C. Thompson, E. R. Mackow, and F. N. Chang 319

BIOCHEMICAL GENETICS AND CELLULAR DIFFERENTIATION AND DEVELOPMENT

- Cloning of Total mRNA Populations from Adult and Embryonic Mice
Michael J. Tocci, Kenneth A. Fleming, and John J. Monahan 140

BIOLOGICAL OXIDATION AND BIOENERGETICS

- Elevated Intramitochondrial Adenine Nucleotides and Mitochondrial Function
Helen C. Hamman and Robert C. Haynes, Jr. 85
- Ruthenium Red-Sensitive and -Insensitive Release of Ca^{2+} from Uncoupled Heart Mitochondria
Marianne S. Jurkowitz, Timothy Geisbuhler, Dennis W. Jung, and Gerald P. Brierley 120
- Antioxidant Activity of Uric Acid and 3-N-Ribosyluric Acid with Unsaturated Fatty Acids and Erythrocyte Membranes
Robert C. Smith and Lisa Lawing 166

COENZYMES

- Chromophoric Derivatives of Coenzyme MF_{430} , a Proposed Coenzyme of Methanogenesis in *Methanobacterium thermoautotrophicum*
Jan T. Keltjens, C. Gerda Caerteling, Annette M. Van Kooten, Harrie F. Van Dijk, and Godfried D. Vogels 235

ENZYME MECHANISMS AND METABOLISM

- Kinetics of Anthracycline Antibiotic Free Radical Formation and Reductive Glycosidase Activity
Peter L. Gutiérrez, Malcom V. Gee, and Nicholas R. Bachur 68
- Purification and Properties of a Factor from Rat Liver Cytosol Which Stimulates Vitamin K Epoxide Reductase
Charles M. Siegfried 129
- Ionization-Linked Cooperative Interactions in the Active Site of Horse Liver Alcohol Dehydrogenase
Christian Syvertsen and John S. McKinley-McKee 213
- Purification and Properties of a NAD-Linked 1,2-Propanediol Dehydrogenase from Propane-Grown *Pseudomonas fluorescens* NRRL B-1244
Ching T. Hou, Ramesh N. Patel, Allen I. Laskin, Nancy Barnabe, and Irene Barist 297

IMMUNOLOGY

- Immunochemical Studies on the Binding Specificity of the Blood Group Le^b Specific Lectin *Griffonia simplicifolia* IV
Paul M. Kaladas, Elvin A. Kabat, Satoaki Shibata, and Irwin J. Goldstein 309

LIPIDS

Stimulation of Calcium Uptake by 1-Alkyl-2-Acetyl- <i>sn</i> -Glycero-3-Phosphocholine (Platelet-Activating Factor) in Rabbit Platelets: Possible Involvement of the Lipoxygenase Pathway	<i>Ten-ching Lee, Boyd Malone, and Fred Snyder</i>	33
Comparison of Glycerophosphate Acyltransferases from <i>Euglena</i> Chloroplasts and Microsomes	<i>Susan Hershenson, Beverly A. Boehler-Kohler, and Mary Lou Ernst-Fonberg</i>	76
Further Characterization of the Heat-Stable Factor in the α -Hydroxylation and Oxidation of Lignoceric Acid in Brain: Effect of Acidic Amino Acids and Hexose-Phosphates on Brain Fatty Acid Metabolism	<i>Hiroshi Shimeno, Nobuyuki Okamura, Anupam Wali, and Yasuo Kishimoto</i>	95
Effect of Modification of Membrane Phospholipid Composition on the Activity of Phosphatidylethanolamine <i>N</i> -Methyltransferase of <i>Tetrahymena</i>	<i>Joseph Donald Smith</i>	193

MEMBRANE STRUCTURE AND FUNCTION

Na^+ , K^+ , H^+ and Cl^- Permeability Properties of Rabbit Skeletal Muscle Sarcolemmal Vesicles	<i>John R. Gilbert and Gerhard Meissner</i>	9
Effect of Ethanol on Synaptosomal ($\text{Na}^+ + \text{K}^+$)-ATPase in Control and Ethanol-Dependent Rats	<i>Jay Y. Westcott and Henry Weiner</i>	51
The Distribution of ATPase Activities in Purified Transverse Tubular Membranes	<i>Roger A. Sabbadini and Vincent R. Okamoto</i>	107
Regulation of Glucose 6-Phosphatase in Hepatic Microsomes by Thyroid and Corticosteroid Hormones	<i>Susheela L. Iyer, Andrew C. Liu, and Christopher C. Widnell</i>	173
Adsorption of Sphingomyelinase of <i>Bacillus cereus</i> onto Erythrocyte Membranes	<i>Masahiro Tomita, Ryo Taguchi, and Hiroh Ikezawa</i>	202

PHOTOSYNTHESIS AND PLANT BIOCHEMISTRY

Characterization of a Soybean Cultivar Lacking Certain Glycinin Subunits	<i>P. E. Staswick and N. C. Nielsen</i>	1
Analysis of Catalytic Subunit Microheterogeneity in Ribulosebiphosphate Carboxylase/Oxygenase from <i>Nicotiana tabacum</i>	<i>Sarjit Johal and Raymond Chollet</i>	40
Structure of a Bacterial Photosynthetic Membrane. Isolation, Polypeptide Composition, and Selective Proteolysis	<i>Jules S. Jacob and Kenneth R. Miller</i>	282
Purification and Properties of an Asparagine Aminotransferase from <i>Pisum sativum</i> Leaves	<i>Robert J. Ireland and Kenneth W. Joy</i>	291

PHYSICAL BIOCHEMISTRY AND PHYSICAL CHEMISTRY OF MACROMOLECULES

Stability of Allophycocyanin's Quaternary Structure	<i>Robert MacColl</i>	24
Histone H1: Ultracentrifugation Studies of the Effects of Ionic Strength and Denaturants on the Solution Conformation	<i>Edwin A. Lewis and R. Renee Reams</i>	185
Polymerization of Tobacco Mosaic Virus Protein without and with Hydrogen Ion Binding	<i>Ragaa A. Shalaby and Max A. Lauffer</i>	224

POLYSACCHARIDES AND COMPLEX CARBOHYDRATES

- The Biosynthesis of Crustacean Chitin. Isolation and Characterization of Polyprenol-Linked Intermediates from Brine Shrimp Microsomes
Michael N. Horst 254

PROTEIN STRUCTURE, FUNCTION, AND TURNOVER

- 600 MHz ^1H Nuclear Magnetic Resonance Studies of the Kringle 4 Fragment of Human Plasminogen
S. M. Hochschwender, R. A. Laursen, A. De Marco, and M. Llinas 58

PROTEIN SYNTHESIS

- Biosynthesis and Processing of Rat α_1 -Antitrypsin
Kathryn M. Verbanac and Edward C. Heath 149
- Post-Translational Processing Reactions Involved in the Biosynthesis of Lysosomal α -N-Acetylgalactosaminidase in Cultured Human Fibroblasts
Charles C. Sweeley, Norman C. LeDonne, Jr., and Phillips W. Robbins 158

REGULATION OF METABOLISM AND OF ENZYME ACTION

- Decrease of Renal Phosphoenolpyruvate Carboxykinase RNA and Poly(A)⁺ RNA Level by Ochratoxin A
Herman Meisner, Michele A. Cimbala, and Richard W. Hanson 264

NUMBER 2, JUNE 1983

INVITED PAPER

- Regulation of Protein Synthesis Initiation in Eucaryotes
Severo Ochoa 325

COMMUNICATION

- Reduction of Laccase Type 1 Copper by 3,4-Dihydroxyphenylalanine and Other Catechol Derivatives
Max Wynn, Gary Stevens, David B. Knaff, and Robert A. Holwerda 662

BIOLOGICAL OXIDATION AND BIOENERGETICS

- A Time Lag in the Onset of ATP- P_i Exchange Catalyzed by Purified ATP-Synthase (CF_0 - CF_1) Proteoliposomes and by Chloroplasts
Yosepha Shahak and Uri Pick 393
- Evidence for Suitability of Glutathione Peroxidase as a Protective Enzyme: Studies of Oxidative Damage, Renaturation, and Proteolysis
Richard A. Condell and Al L. Tappel 407
- Increased Microsomal Oxidation of Hydroxyl Radical Scavenging Agents and Ethanol after Chronic Consumption of Ethanol
Shelley M. Klein, Gerald Cohen, Charles S. Lieber, and Arthur I. Cederbaum 425
- Isolation and Reconstitution of an N-Ethylmaleimide-Sensitive Phosphate Transport Protein from Rat Liver Mitochondria
Janna P. Wehrle and Peter L. Pedersen 477

- Escherichia coli* Mutants Defective in the γ Subunit of Proton-Translocating ATPase: Intracistronic Mapping of the Defective Site and the Biochemical Properties of the Mutants
Hiroshi Kanazawa, Takato Noumi, Masamitsu Futai, and Takako Nitta 521

COENZYMES

- Configurational, Conformational, and Solvent Effects on the Reduction of a Schiff Base by Reduced Pyridine Nucleotide Analogs
R. Srinivasan and Harvey F. Fisher 453

ENZYME MECHANISMS AND METABOLISM

- Acyl Phosphate and Cyclic AMP Inhibition of Reactions of D-Glyceraldehyde-3-Phosphate Dehydrogenase with Aldehyde and Acyl Phosphate Substrates: Multiple Inhibition Analysis
Bruce R. DeMark, Bruce M. Benjamin, and Thomas H. Fife 360
- Paracatalytic Inactivation of Pig Heart Pyruvate Dehydrogenase Complex
Balázs Sümegi and István Alkonyi 417
- Ketomethylthiobutyric Acid Formation from Methylthioadenosine: A Diffusion Assay
John I. Toohey 533

IMMUNOLOGY

- Immunological Correlates between Multiple Isolated Subunits of *Androctonus australis* and *Limulus polyphemus* Hemocyanins: An Evolutionary Approach
Josette Lamy, Solange Compin, and Jean N. Lamy 584

LIPIDS

- Characterization of Brain Phosphatidylserine Decarboxylase: Localization in the Mitochondrial Inner Membrane
A. K. Percy, J. F. Moore, M. A. Carson, and C. J. Waechter 484

MEMBRANE STRUCTURE AND FUNCTION

- Electron Spin Resonance Studies of the Effects of Lipids on the Environment of Proteins in Mitochondrial Membranes
G. Lenaz, G. Curatola, L. Mazzanti, G. Zolese, and G. Ferretti 369
- Transport of Methotrexate in Chinese Hamster Ovary Cells: A Mutant Defective in Methotrexate Uptake and Cell Binding
Wayne F. Flintoff and Charles R. Nagainis 433
- The Influence of Phospholipase A₂ and Glutathione Peroxidase on the Elimination of Membrane Lipid Peroxides
Alex Sevanian, Samar F. Muakkassah-Kelly and Sylvia Montestruque 441
- Isolation of Mitochondria, Lysosomes, and Microsomes from the Rat Ventral Prostate with a Note on Inverted Microsomal Vesicles
Tapio Haaparanta, Jan-Åke Gustafsson, and Hans Glaumann 458
- A Dynamical Study on the Interactions between the Cytoskeleton Components in the Human Erythrocyte as Detected by Saturation Transfer Electron Paramagnetic Resonance of Spin-Labeled Spectrin, Ankyrin, and Protein 4.1
Yolande Lemaigre Dubreuil and Robert Cassoly 495
- The Role of Protease in Streptolysin S Formation
Teruaki Akao, Taiko Akao, Kyoichi Kobashi, and Chun-Yen Lai 556

OXYGENASES, MICROSOMES, AND P-450 REACTIONS

- The Reaction of Arachidonic Acid Epoxides (Epoxyeicosatrienoic Acids) with a Cytosolic Epoxide Hydrolase *N. Chacos, J. Capdevila, J. R. Falck, S. Manna, C. Martin-Wixtrom, S. S. Gill, B. D. Hammock, and R. W. Estabrook* 639

PHOTOSYNTHESIS AND PLANT BIOCHEMISTRY

- Evidence for a Carbanion Intermediate in Catalysis by Spinach Ribulose-1,5-Bisphosphate Carboxylase/Oxygenase *Anil S. Bhagwat and Bruce A. McFadden* 604
- Pyridoxal Phosphate as a Probe in the Active Site of Ribulose Bisphosphate Carboxylase/Oxygenase *Anil S. Bhagwat and Bruce A. McFadden* 610
- Malate Synthase: Aggregation, Deaggregation, and Binding of Phospholipids *Cornelia Kruse and Helmut Kindl* 618
- Oligomerization of Malate Synthase during Glyoxysome Biosynthesis *Cornelia Kruse and Helmut Kindl* 629

PHYSICAL BIOCHEMISTRY AND PHYSICAL CHEMISTRY OF MACROMOLECULES

- Manganese, Calcium, and Saccharide Binding to Concanavalin A, as Studied by Ultrafiltration *Judith A. Sophianopoulos, Alkis J. Sophianopoulos, and Wendy C. MacMahon* 350

PROTEIN STRUCTURE, FUNCTION, AND TURNOVER

- Purification and Characterization of an Extracellular Acid Protease from *Neurospora crassa* *W. Gale Rhodes, Richard A. Lindberg, and Harvey Drucker* 514
- Factors Affecting the Oligomeric Structure of Yeast External Invertase *Frederick K. Chu, Wieslaw Watorek, and Frank Maley* 543
- Conformational Stability of Type I Collagen Triple Helix: Evidence for Temporary and Local Relaxation of the Protein Conformation Using a Proteolytic Probe *Lasse Ryhänen, Edward J. Zaragoza, and Jouni Uitto* 562
- Turnover of Cytoplasmic and Mitochondrial Aspartate Aminotransferase Isozymes in Mouse Liver and Transplantable Hepatomas *Jacquelin B. Shaffer and Michael R. Felder* 649

REGULATION OF METABOLISM AND OF ENZYME ACTION

- Influence of Valproic Acid on Hepatic Carbohydrate and Lipid Metabolism *Cord-Michael Becker and Robert A. Harris* 381
- Regulation of Adenylate Cyclase in Cultured Cardiocytes from Neonatal Rats by Adenosine and Other Agonists *Madhu B. Anand-Srivastava and Marc Cantin* 468
- Methylglyoxal-Mediated Growth Inhibition in an *Escherichia coli* cAMP Receptor Protein Mutant *Robert Puskas, Natalie Fredd, Celia Gazdar, and Alan Peterkofsky* 503
- Fructose 1,6-Bisphosphatase in Rat Liver Cytosol: Interactions between the Effects of K^+ , Zn^{2+} , Mn^{2+} , and Fructose 2,6-Bisphosphate as Measured in a Steady-State Assay *Stéphanie Mörkofer-Zwez* 572
- AUTHOR INDEX FOR VOLUME 223 667

The Subject Index for Volume 223 will appear in the December 1983 issue as part of a cumulative index for the year 1983.

in 2026

Instructions to Authors¹

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. Manuscripts are welcome that contain new and significant information of general interest to workers in these fields. Sufficient detail must be included to enable others to repeat the work.

Manuscripts should be written in clear, concise and grammatical English and should be submitted in triplicate (one original and two photocopies), including three sets of figures, to:

Archives of Biochemistry and Biophysics
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. Contributors will receive decision letters from the Executive Editor. Resubmitted manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. Normally they should not exceed 15 manuscript pages in length (including text, bibliography, tables, and figures). The review and printing of such papers will be expedited to provide earliest possible publication.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet; footnotes to tables should be identified by superscript lowercase italic letters (^a, ^b, etc.) and placed at the bottom of the table.

¹ An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC-IUB rules and recommendations, and accepted abbreviations.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single spaced whenever possible and preferably submitted as 5×7 -in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. Line drawings should be professionally drafted and no larger than 8.5×11 in. Letters and numbers should be at least $\frac{3}{16}$ in. (4 mm) in height (Leroy lettering size 200). Glossy prints of figures properly prepared are acceptable.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1969. Please note the following examples.

1. JONES, J. B., DILWORTH, G. L., AND STADTMAN, T. C. (1979) *Arch. Biochem. Biophys.* **195**, 255-260.
2. METZLER, D. E. (1977) *Biochemistry: The Chemical Reaction of Living Cells*, p. 298, Academic Press, New York.
3. HARRINGTON, W. F. (1979) in *The Proteins* (Neurath, H., and Hill, R. L., eds.), Vol. 4, pp. 246-409, Academic Press, New York.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.
